SUMMARY

I am a BSc (Computer Science) student with a solid foundation in programming and web development. I have hands-on experience with C, C++, Java, and a basic understanding of Python. I have good knowledge of HTML, CSS, and PHP for web development, and I'm familiar with version control using Git and GitHub. Also I have problem solving ability and communication skills.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Java, Python
- **Database:** MYSQL
- **Web Development:** HTML, CSS, PHP
- **Tools:** VS Code, Git/Github

PROJECTS

EduSync - Integrated College Management Portal	Dec 2024 - Feb 2025
• Designed and developed EduSync, a centralized web-based platform aimed at integrating district/sub-district level colleges to reduce load on university portals like SPPU. • Streamlined end-to-end academic processes including student admissions, exam form submissions, hall ticket downloads, and result viewing across four affiliated colleges. • Implemented role-based dashboards for students, teachers, and admins, enabling secure access and efficient data management aligned with university affiliation guidelines. • Empowered teachers to manage student marks and send targeted notifications (individual, semester-wise, or all students) directly to student dashboards. • Admin dashboard functionality includes form verification, managing teacher accounts, and sending notifications regarding form corrections and updates.	

EDUCATION

Bsc (Computer Science)	July 2022 - April 2025
